

# Jiangsu Technical Symposium on Highway Widening

Nanjing, China, October 26-27, 2004

## CALL FOR SPEAKERS

The North America Chinese Overseas Transportation Association (NACOTA), Jiangsu Transportation Research Institute, and Nanjing-Shanghai Expressway Company are organizing a joint technical symposium on highway widening. The purpose of this symposium is to discuss potential technical problems that may be encountered during the widening of Hu-Ning Expressway, to propose technical solutions to potential problems identified, to improve the current techniques used for highway widening, and to improve construction quality. The topics of the workshop will be:

- Design Standards for highway widening
- Evaluation of existing pavement
- Techniques for connecting old and new pavements
- Subgrade soil treatments and settlement controls
- Bridge widening
- Asphalt pavement recycle and reuse
- New technology, new material, and new specification
- Traffic control for eight-lanes express-highway

**DATE:** October 26-27, 2004

**LOCATION:** Nanjing, China

### FINANCIAL SUPPORT TO QUALIFIED ATTENDANTS:

The organizer will pay the travel and lodging expenses for experts with strong qualifications.
